Experience

Python Developer Intern – Ishan Ceramics Pvt. Ltd. , Agra (October 2025 – March 2026)

Odoo Modules: Developed and customized Python modules to automate workflows and enhance functionality.

AI Agents: Designed and implemented intelligent agents to improve process efficiency and decision-making.

Image Processing: Extracted and processed images using Python for accurate data retrieval.

System Integration: Integrated custom Python logic with existing systems and databases for seamless data flow.

Full Stack Web Developer Intern – Infoseeds,Delhi (June2024 – August 2024)

Frontend Optimization: Tested and optimized components for responsiveness and cross-browser compatibility.

UI Testing: Conducted manual testing to ensure smooth interactions and consistent layouts across modules.

API Integration: Verified frontend-backend integration for accurate data rendering.

Collaboration: Worked with developers to resolve UI bugs and improve overall user experience.

Technical Skills & Tools

Programming & Development: Python (Data Analysis & Python Development), Java, SQL
Data Science & Analytics: Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis
Machine Learning: Regression Models, Classification Techniques, Model Evaluation & Optimization
Data Visualization & BI Tools: Power BI, Tableau, Matplotlib, Seaborn
Other Skills: OOPs Concepts, Bug Reporting, Test Case Design, Debugging, Performance Validation

Projects

Monkey-pox-detection

- Developed an AI-based Monkeypox Detection system using Xception, EfficientNet, InceptionV3, ResNet, MobileNet, Python, TensorFlow, and Keras.

- Implemented Ensemble Learning with Scikit-learn and Keras, improving diagnostic accuracy and reducing false positives.

- Performed image preprocessing, augmentation, and normalization with OpenCV, NumPy, and Pandas, and evaluated model performance using Accuracy, Precision, Recall, and F1-score.

Django StudyBuddy Application

- Developed and tested chat room creation and user authentication workflows using Python, Django, and Django REST Framework (DRF) for secure, scalable messaging.

- Implemented input validation, role-based access control, and error handling with Django, JWT, and RESTful APIs to ensure data integrity and security.

- Integrated backend REST APIs with frontend clients using Django REST Framework, JavaScript, and WebSocket-ready architecture for real-time communication and optimized database performance.

Air-Quality-Index

- Developed an Air Quality Index (AQI) prediction system using Python and machine learning models including Linear Regression, Lasso, KNN, Decision Tree, Random Forest, XGBoost, and ANN.

- Performed data extraction, cleaning, and feature engineering using Pandas and NumPy, and visualized trends with Matplotlib and Seaborn for better model insights.

- Evaluated and compared model performance using metrics such as R^2 score, MAE, and RMSE to identify the best-performing model for reliable AQI forecasting.

Education

B.Tech – Information Technology
Hindustan College of Science and Technology, Mathura (2021–2025)
CGPA: 6.4

Positions of Responsibility

- **President, Cultural Department (2023–25):** Led 20+ events, coordinated 50+ students, ensuring smooth event execution and quality control.
